Incentive Payment Options per Acre	Practice Payment	Acres	Payment
Additional Practices			
Follow approved Nutrient Management Plan	70%		\$
Total Eligible Incentive Payment			\$

This contract is entered into between the City of Andale and the undersigned landowner(s) and/or Tenant(s) (herein referred to as Operator). By signing below, the operator understands and agrees that upon his/her signature this contract will become effective. The operator agrees, as soon as practicable after his/her signature, to implement the contract and provide certification of completion (i.e. invoices and/or receipts) to the Sedgwick County Conservation District office.

Furthermore, the undersigned operator agrees to the terms set forth herein by the regulations governing the Division of Conservation Water Resources Cost-Share Program to include:

- 1) I understand that as a condition of receiving incentive assistance, I have not begun construction or installation of these practices until approved.
- 2) Should I fail to maintain the practice according to Approved Standards and Specifications, it is understood that I may be declared ineligible for future cost-share funds and will be required to pay back to the City of Andale incentive funds received.

Drinking Water Protection Incentive Program Site Specific Nutrient Management Plan

Nutrient management involves managing the amount, placement and timing of plant nutrients to obtain optimum yields and minimize the risk of surface and groundwater pollution. The Kansas Department of Health and Environment – Drinking Water Protection Incentive Program offers financial assistance as an incentive to assist operators in better achieving these goals.

- Operators will receive a 70% cost share on Nutrient Management Practices such as:
 - Grid or Zone Sampling + Data Analysis + the additional upcharge cost to apply with a Variable Rate Technology (VRT) spreader
 - An initial payment will be provided after the Grid Sampling, Data Analysis and first year of VRT application are completed.
 - Grid or Zone Soil Sampling + Data Analysis produces a prescription that is good for 4 years. **The producer must agree to use VRT Application for all 4 years that the prescription is good for.**
 - Documentation is required each of the 4 years of the nutrient management application; this will include the “As Applied Map” as well as invoices showing expenditures for nutrient management applications. (Provided that DWPP funds are available, Operators will receive 70% cost share in years 2-4 for the additional upcharge cost to apply with a Variable Rate Technology (VRT) spreader.)
- All Nutrient Management Plans must be submitted to the Coordinator for approval and have a contract in place prior to implementation.
