

We, the children of Lynn Buerki, have partnered with the Sedgwick County Conservation District to honor the legacy of our dad.

He practiced conservation daily in his farming operation by terracing, maintaining waterways, controlling erosion, and planting shelterbelts for wildlife and wind protection. Hence, he became known as “Mr. Conservation” for his strong commitment and dedication to soil and water conservation.

Our dad had a vision...”the trees I plant today are not for me but will be enjoyed by the next generation.” This scholarship was funded and established to help provide educational opportunities for the next generation.
